COVID - 19 | Key Indicators
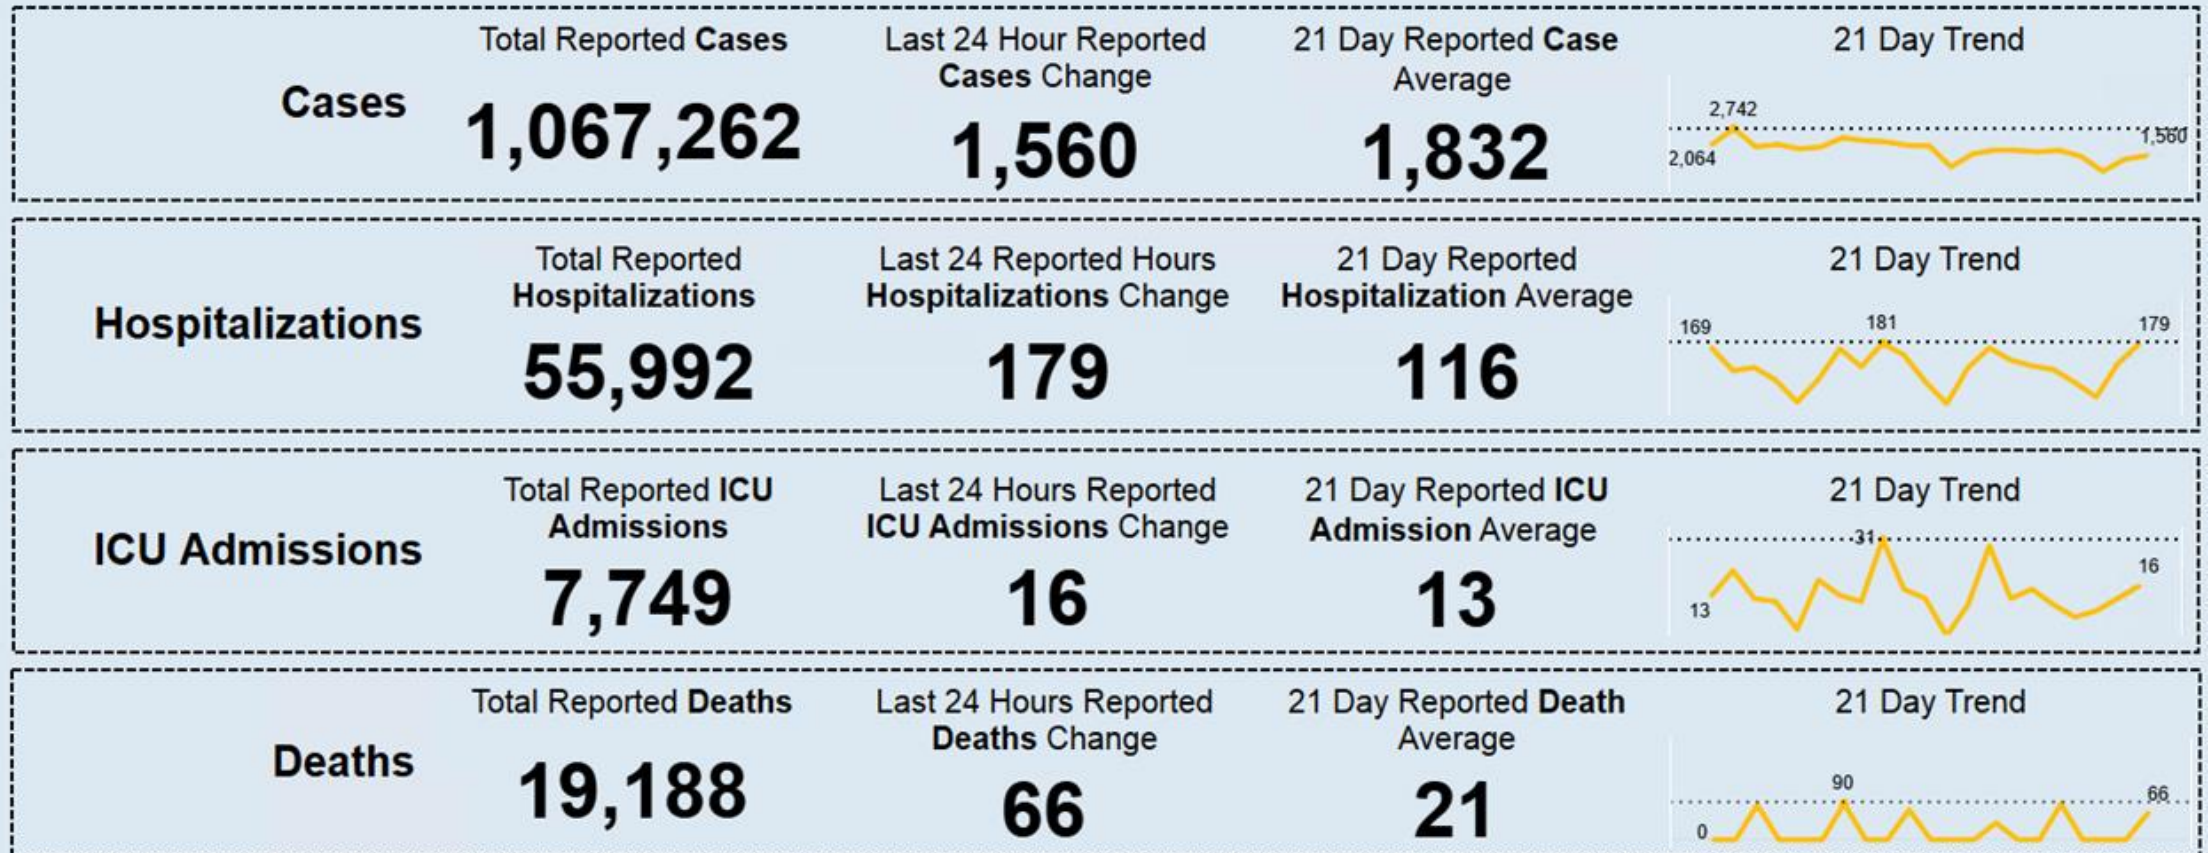

Other states do not send death certificates to ODH's Bureau of Vital Statistics on a regular schedule and therefore fluctuations will be reflected in reported mortality data. Deaths are assigned to their appropriate date of death.

Cases

	Total Reported Cases	Last 24 Hour Reported Cases Change	21 Day Reported Case Average	21 Day Trend
Cases	1,067,262	1,560	1,832	2,742 / 2,064 ... 1,560

Hospitalizations

	Total Reported Hospitalizations	Last 24 Reported Hours Hospitalizations Change	21 Day Reported Hospitalization Average	21 Day Trend
Hospitalizations	55,992	179	116	169 / 181 / 179

ICU Admissions

	Total Reported ICU Admissions	Last 24 Hours Reported ICU Admissions Change	21 Day Reported ICU Admission Average	21 Day Trend
ICU Admissions	7,749	16	13	31 / 13 / 16

Deaths

	Total Reported Deaths	Last 24 Hours Reported Deaths Change	21 Day Reported Death Average	21 Day Trend
Deaths	19,188	66	21	90 / 0 / 66

All dates are based when an indicator is reported and will not match data in other COVID-19 dashboards provided by the Ohio Department of Health. All other dashboards are based on onset date, date of hospitalization, or date of death.

Mortality data is verified by coded death certificate information received from the National Center for Health Statistics, and can take some time to receive. This information is not available daily, and is updated approximately twice per week as data is received.

**Starting 03/02/2021, the COVID-19 death data will be reported from the Electronic Deaths Registration System. The "Last 24 Hour Reported Change", "21 Day Reported Average" and "21 Day Trend" metrics will initially be incomplete but will continue to be updated.
